## Professional Profile

I am a person who is passionate about continuous learning, problem solving and web development both in the backend and in the frontend. I have experience in individual and team projects, which has taught me the importance of effective communication. I am currently starting my path as a Freelancer in web development, my goal is to offer good deadline management and quality work oriented to results and achieve success in this stage of my career.

## Experience

### Master Recipes | Stack PERN Project

- Individual Project where its objectives were to use an external API for recipes, manage a backend and database, manage a design for it, using the technologies; Git , PostgreSQL, Express, Node, React with Javascript and CSS.
- The main challenge was the organization of time since I had a delivery date limit, despite this I was able to structure my ideas and tasks in order to carry out the project and successfully meet the requirements given for delivery.
- [Repository](#) y [Deploy](#).

### Orion Musicx | E-commerce Project (Team)

- E-commerce page group project where music tracks are sold, a planned design was managed, where I collaborated with 7 people using the technologies; Git, Node, Firebase, React, Redux, Javascript, Css and Bootstrap, payment gateways with Paypal and third-party authentication.
- The challenges that I had in this project were the organization, tasks to be carried out, objectives, it was possible to organize ideas, concepts, and work methods, using the SCRUM methodology, all this led by a scrum master who guided us in the process to achieve successful development of the project also accompanied by tools such as Trello and Figma.
- [Repository](#) y [Deploy](#).

## Education

- Henry Bootcamp | Full Stack Web Developer.  
August – 2022 | February 2023.  
Remote.
